Course Number : 420-331-VA

Teacher : Syed Naseem Afzal
Due Date : April 16, 2026

Please download the file "**Database_Lab06.zip**" from LEA. Read all the text of the **DatabaseLab_VS2022.pdf** and perform the following tutorials.

No.	Assigned Work	Pages	Point(s)
1.	Creating a Database in Visual Studio	01-18	5
2.	Completing the LibraryBooks application with DataGridView control	19-25	5
3.	Creating the Products application with Details view control	26-34	5
4.	Creating the Product Lookup application with customize DataGridView control and customize Details view control	35-40	5
5.	Creating the MultiForm Products application	41-46	5
6.	Creating the Product Queries application	47-66	10
7.	Creating the Product Search application	67-71	5

What to hand in?

After successful demonstration, create a compressed file [**Filename:** LastNameFirstNameLab06.ZIP], with the following:

- a) MS-Word document [**Filename:** LastNameFirstNameLab06.docx] containing screen shots of your examples' GUI with input values and produced output.
- b) Your working examples' project(s) folders.

Upload your LastNameFirstNameLab06.ZIP file in LEA's assignment section.

Note: Your uploaded (ZIP) file should contain all files of the working examples' project folders. Incomplete and / or non-working app's files will not be graded and have zero value.
